Education

Indian Institute of Information Technology Jabalpur 2022–2026
B.Tech. in Electronics and Communication Engineering

Experience

Full Stack Developer Intern – TOSS Solutions Feb 2026–August 2026

- Developed and enhanced a production-grade Vendor Management System (VMS) using React, Node.js, Express, TypeScript, and MongoDB, streamlining end-to-end vendor onboarding lifecycle management.
- Designed and implemented 40+ REST APIs supporting vendor onboarding, invoice processing, document verification, and multi-stage approval workflows.
- Built 15+ dynamic React forms with conditional rendering, reusable components, validation, file uploads, and seamless frontend-backend integration.
- Implemented Role-Based Access Control (RBAC) across 10+ user roles.
- Developed multi-stage approval workflows supporting Domestic, International, and Government vendors.
- Integrated JWT authentication, OTP-based verification, document upload flows, and secure REST APIs while collaborating through Git and Azure DevOps in an Agile environment.

Projects

Mythic Arena – Full-Stack Real-Time Card Game GitHub Repository | Live Link Sep 2026

- Built a **full-stack 1v1 card game** with React.js and Node.js featuring authentication, 30-card deck building, practice mode, real-time matchmaking, turn-based combat, and persistent match history.
- Developed a **deterministic server-authoritative game engine** implementing validated actions, energy/turn systems, unit combat, Guard/Shield mechanics, spell effects, deck/hand limits, fatigue, and win/draw conditions.
- Implemented **real-time multiplayer architecture** using Socket.IO, Redis, and MongoDB with matchmaking, active-game state management, reconnect handling, action deduplication, secure authentication, and persistent game results.

Customer Support AI Assistant GitHub Repository | Live Link May 2026

- Developed a full-stack AI-powered customer support system using React.js, Node.js, Express.js, and Supabase PostgreSQL, enabling AI-assisted conversations with persistent chat history.
- Integrated an LLM-based classification and response pipeline with Zod validation to categorize support queries and automatically identify urgent, low-confidence, or unsupported requests.
- Engineered a reliable human-handoff workflow using n8n automation, with duplicate escalation prevention, rate limiting, CORS protection, and graceful AI/API failure handling.

Achievements

- Gold Medalist – Inter IIIT Kabaddi Championship (2025).
- Solved 500+ DSA problems across major coding platforms.

Technical Skills

Programming Languages: JavaScript, Python, C++
Frontend: React.js, HTML5, CSS3, Vite
Backend: Node.js, Express.js, REST APIs, JWT Authentication
Databases: MongoDB, MySQL
Tools: Git, Azure DevOps, Postman, Firebase, Cloudinary
Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems

Coursework

- Data Structures and Algorithms
- Object Oriented Programming
- Operating Systems
- Database Management Systems
